

COOLOOLA CHRISTIAN COLLEGE LIMITED

Growing God's Kingdom through Excellence in Education

6 October 2021

Dear parents and caregivers,

Over recent months we have been developing a Master Plan in consultation with architects and the College Board. As we steadily grow numbers and strive to grow God's Kingdom through Excellence in Education, we must ensure that our facilities also develop and expand to accommodate the future direction of the College.

Over recent years we have:

- built a state-of-the-art STEM facility that caters for our growing design, technologies, and science departments;
- created an outdoor amphitheatre for performing Arts;
- redeveloped our Arts facility at I Block;
- built a community meeting space at Solid Grounds Coffee;
- made improvements to our Learning Hub which included building two additional learning spaces and an indoor amphitheatre;
- completed a ring road to allow for easier, and safe access for our families and students during drop off and pick up;
- made significant improvements to the sound system in the multi-purpose hall;
- built additional music rooms for our expanding Instrumental Music program.

Current projects in line with our Master Plan are:

- a renovated and extended Administration building;
- closing in under L and J Block to create additional classrooms;
- additional student lunch areas.

Administration Building

Our current Administration building was the first building built on the block of land purchased for the College over 23 years ago. The building was originally purpose built to be two classrooms, along with an office space for administration and business staff. Since its development the space has been used for IT, uniforms, offices, classrooms, and the list goes on. It is now time for us to expand and renovate this space to accommodate our growing administration and business teams as they serve our CCC community with excellence. The renovation will include a purpose built First Aid space, additional meeting spaces, open office spaces, work rooms and a staff common area including an outdoor courtyard.

Work on the site will commence at the beginning of November. The Administration and Business offices will relocate to The Learning Hub throughout the Christmas period and be ready to move back into their renovated space during the 2022 PL Week.

Growing God's Kingdom through Excellence in Education

J & L Block Renovations

Work will commence over the Christmas holidays to close in under J block to create a Drama room, including a video/production room and storeroom. This will make space in SBH for an additional Primary classroom in 2022.

A general purpose Secondary classroom will be built under L block.

Student Lunch Areas

Addition student seating and lunch areas will be provided for Secondary students.

We thank God for His faithfulness to the College and the way He has allowed us to use resources and facilities to educate young people in the Gympie region.

If you have any further questions regarding current projects please contact our Business Manager, Paul Suffolk.

Blessings,

Senior Leadership Team
