HOLIDAY PROGRAM COURSE GUIDE

Digital Defenders

CYBER SECURITY FOUNDATIONS.

Year levels: 8-10

Dates: 28 September 2026 - 2 October 2026

Total price: $950

In an always-connected world, cyber security is a life skill. This Spring Holiday Intensive gives Years 8–10 students a hands-on introduction to how cyber threats work and how real professionals think when protecting people, data, and systems. Co-designed with industry experts from Cyber CX, students will explore contemporary challenges like scams, social engineering, identity protection, and responsible online behaviour, while learning practical strategies they can use immediately.

The program runs in a blended online format: daily live workshops combined with structured self-paced learning tasks. Students will practise "thinking like a defender" through guided scenarios, collaborative problem-solving, and short challenges that build confidence without requiring prior coding experience.

What students will learn:

- How cyber attacks commonly happen and how to spot red flags
- Core protection habits: secure accounts, safer browsing, privacy settings, and digital footprints
- How to respond to incidents: reporting, evidence, recovery steps, and prevention
- Team-based cyber thinking: risk, ethics, and pathways into future study and careers.

Monday - Friday

Orientation and tech check will take place on the Monday at 8.00 am - 8.30 am.

8.30 am - 9.15 am	Session 1
