2027 iPad Program for Years 4, 5, and 6

In 2027, Mosman Prep continues its fully school-managed iPad program for students in Years 4, 5, and 6, following the retirement of the Bring Your Own (BYO) iPad Program. All students are issued with a school-managed iPad, ensuring a consistent, secure, and reliable learning experience. The iPads remain school property, and students are responsible for their care throughout their time at Mosman Prep.

Parents will be charged an annual levy for the device, with the option to take ownership after three years. If a student leaves before completing the three-year period, families may pay the remaining balance to keep the iPad.

For students joining Mosman Prep mid-year in Years 4, 5, or 6, the school will provide a new iPad ready for use upon arrival. At times, near-new iPads may also be available at discounted prices.

Full-Sized Keyboards

To support typing, writing tasks, and online assessments, the school provides a full-sized external keyboard for every student from Year 3 to Year 6. These remain paired with the student's school-managed iPad for the duration of the year.

Technology Agreement (Including Responsible AI Use)

All students are required to complete a Technology Agreement each year, outlining expectations for safe, responsible, and respectful use of technology. This includes the appropriate use of school-managed iPads, online learning platforms, and the responsible use of Artificial Intelligence (AI) tools where permitted. Parents will be prompted to acknowledge and approve this agreement through the Parent App before their son's iPad is issued. Further details are available on the Technology page of the school website.

Mobile Device Management (MDM) Service

An annual iPad Management fee of $20 per iPad covers the Mobile Device Management (MDM) system (JAMF). This service enables the school to remotely install required apps, enforce security settings, and manage all device configurations. If iPads are taken home for projects or holidays, families are asked not to remove or alter the school's management profiles to ensure continued security and functionality.
