To become a qualified Veterinary Nurse and work in a Veterinary Practice you need to complete the nationally recognised Certificate IV in Veterinary Nursing (ACM 40412).

Applied Vocational Training is a registered training organisation run by veterinarians, animal scientists and veterinary nurses who combine outstanding industry knowledge with extensive experience in vocational teaching. On campus courses are offered at our Training Centre in Bentley and online correspondence study options are also available.

ON CAMPUS COURSES

Our comprehensive on-campus veterinary nursing courses are designed to provide you with the skills and required knowledge to start your career as a veterinary nurse. We combine a high standard of theoretical knowledge with intensive practical training in a veterinary practice so that you gain competence and confidence required for this exciting and rewarding career.

- All veterinary practice placements are arranged for you in high quality hospitals
- Tutored by veterinarians and vet nurses
- Strong employment prospects on completion
- Austudy approved
- Flexible payment options
- Nationally Accredited (ACM40412)

Full time - 1 year

Our full time course runs from February to December following school term dates. Attendance is a combination of classroom based lectures at our college and practical workplace training in a veterinary practice.

Part time - 2 years

For students unable to study full-time, this is the ideal study option. The course content is exactly the same as the full-time course but is delivered over two years instead of one. Attendance is 1 day per week on campus during school terms and practical placements are flexible to suit the student’s individual circumstances.

CORRESPONDENCE COURSE

up to 3 years

We offer our Certificate IV in Veterinary Nursing program via correspondence for students in Perth and all over Australia.

- Study at your own pace
- 3 years to complete your studies
- Flexible payment plans and PAYG options available
- Nationally Accredited (ACM40412)
- You will need to find your own veterinary practice placement for your practical training.
