Immersive Learning in Action: Connecting Students with Tomorrow's Careers

Toorak College believes that meaningful encounters with industry professionals have the power to transform how young women see themselves and their futures. Through our partnership with Cox Architecture, students are invited into the heart of Australia's vibrant design world, gaining first-hand exposure to the people, processes, and places that shape our built environment.

This collaboration reflects the school's deep commitment to STEM and design as powerful career pathways for women, connecting students with a profession that blends creativity, technical rigour, and lasting real-world impact.

OBJECTIVES & KEY POINTS

Connecting students with inspiring industry role models and leaders

Broadening understanding of careers and pathways in architecture

Exposure to modern, innovative and collaborative workspaces

CURRICULUM DESIGN

As part of the Year 9 Visual Communication Design elective, students visit Cox Architecture's inner-city offices - a dynamic, working studio that brings the design process to life. The experience goes well beyond observation; students move through thoughtfully designed spaces, engage with prototype constructions from recent projects, and see first-hand how design thinking shapes environments that are both functional and inspiring.

At the heart of the visit are the architects themselves. Young professionals share their personal journeys, the pathways they took, the challenges they navigated, and the work they're proud of, offering Toorak students an authentic and encouraging window into what a future in architecture can look like.

PARTNER WITH US TO INSPIRE THE NEXT GENERATION OF INNOVATORS.
